

Management Policy Manual

L.B.Bentley Ltd.

Title: Environmental Policy Statement

MCP No.: 7-2

L.B.Bentley Limited design, manufacture and supply specialist valves, filtration systems and air drying, purification systems to numerous industrial sectors off-shore, power generation and defence.

Objectives.

L.B.Bentley Limited are committed to recognizing and reducing the environmental impacts directly under their control both locally and globally to the absolute minimum reasonably practicable.

The above commitment shall be realized through:

[a] Continued recognition, evaluation and monitoring of environmental aspects and impacts directly attributable to the company and the development of feasible objectives and targets for *the prevention of pollution*.

[b] Recognition of legal obligations of the company and the implementation of plans and arrangements to ensure compliance with statutory limits as a minimum.

[c] The implementation of a documented management system to meet the requirements of ISO 14001:2004

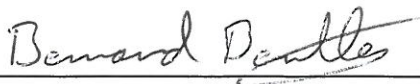

[d] Continued review and monitoring of environmental indicators to ensure effective operation of the implemented management system and continued improvement of environmental performance.

Implementation.

Implementation of the policy shall be through communication, involvement and training of the workforce in the aims, rationale and objectives of environmental management.

As an initial commitment to communication, this policy statement shall be displayed in relevant areas such that workforce and public have access to it, *and available through the company website (www.lb-bentley.com)*.

Signed

Director
on behalf of L.B.Bentley Limited.
