

### INDUSTRY

Subsea

### NEW PRODUCT INITIATIVE

A comprehensive aftermarket service provision.

### CREATIVE ENGINEERED SOLUTIONS FOR SUBSEA DEVELOPMENTS

The 30 years of success in the development, manufacture and delivery of LB Bentley subsea valves is attributed to not just innovative engineering, but to the ability to listen to the requirements of the customer and understanding industry needs.

As part of our ongoing commitment to our customers, LB Bentley Ltd can offer a fully comprehensive aftermarket support service on all of our Subsea product range.

Our aftermarket services are carried out by a fully trained, experienced and committed team of Field Service and Aftermarket Technicians with a wealth of experience and product knowledge.

### REFURBISHMENT SERVICES AVAILABLE

- ✓ Refurbishment and overhaul.
- ✓ Recertification and testing.
- ✓ Surface re-coating and painting.
- ✓ Servicing and repair.

Each requirement can be adapted to suit individual project requirements. Including third party independent witness or product modification.

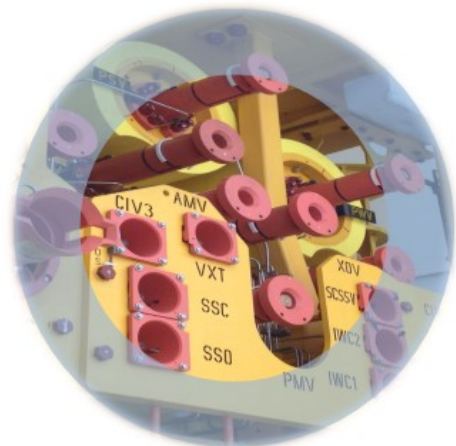

With a specially designed and fully controlled aftermarket department situated within our production facility, each requirement can be individually tailored to specific project needs or refurbished as new.

The same attention to detail is applied to both refurbishment and field service requirements with the same rigorous quality assurance as our new valves, this ensures that the high standard of service we are renowned is delivered and that every customer requirement is fully satisfied.

### FIELD SERVICES AVAILABLE

- ✓ Servicing and repair.
- ✓ Unpacking and installation assistance.
- ✓ Recertification.
- ✓ Assist with SIT and EFAT equipment testing.
- ✓ Onsite product training.
- ✓ Spare parts recommendations.

Our Field Service Technicians can be mobilised at short notice or on scheduled visits for both UK and international work.
